

COVID-19 POTENTIAL INFECTION STEPS

<p>Step 1</p>	<p>Cabin group leader performs daily checks of campers for symptoms of COVID-19, including, but not limited to, use of infrared thermometer. (Thermometer may be provided by Camp Cotubic based on availability) Cotubic and Event Staff and all volunteers complete daily wellness checks for symptoms of COVID-19.</p>
<p>Step 2</p>	<p>If any symptom is discovered, a camper/attendee, staff or volunteer will be discreetly and gently referred to the acting health officer or a nearby urgent care.</p>
<p>Step 3</p>	<p>Health officer or group's designated care giver will perform recheck and validation according to the COVID-19 protocol.</p>
<p>Step 4</p>	<p>A determination will be made to seek outside testing confirmation if deemed appropriate.</p>
<p>Step 5</p>	<p>At that time, the camper/attendee, staff or volunteer will be quarantined to a separate room.</p>
<p>Step 6</p>	<p>For youth, parents will be contacted to pick up the camper within eight hours of initial quarantine to transport to a testing facility. Adult attendees, staff and volunteers will leave property to go to a testing facility.</p>
<p>Step 7</p>	<p>For campers, parents will notify camp of positive or negative results. Adult attendees, staff or volunteers will notify camp of test results.</p>
<p>Step 8</p>	<p>If test results are positive, the Logan County Health Department will be contacted, and contact tracing will be followed up by Camp Cotubic or guest group leaders. Notification to all those potentially impacted within the camp team or camp will follow.</p>
<p>Step 9</p>	<p>If cabin team/campers/attendees are still on property, they will be kept separate from other campers the remainder of the event. For youth, parent/guardian may choose to pick up camper or leave them at camp.</p>
<p>Step 10</p>	<p>Staff and volunteers with confirmed positive test results may only return to the camp when all three of the following criteria are met: at least 3 days have passed since recovery (resolution of fever without the use of fever-reducing medications); individual has improvement in symptoms; and at least 10 days have passed since symptoms first appeared.</p>
<p>Step 11</p>	<p>If three or more campers or staff have tested positive of COVID-19, we will work with public health authorities about continued operations</p>
